

John Mc Cague

Programme Manager, Moog Military Aircraft Group

John is a Programme Manager at Moog's Military Aircraft Group in Wolverhampton, where he leads the team responsible for delivering the flight-control actuators for the Bell MV-75 (FLRAA) aircraft. He has extensive experience managing complex aerospace programmes and is accountable for overall programme performance, including scope, quality, cost, schedule, and customer satisfaction.

Prior to the MV-75 programme, John successfully led multiple aerospace projects from conceptual design and qualification through first flight and into full-rate production. His career spans both engineering and programme management roles, having begun as a Graduate Engineer at Goodrich Actuation Systems.

John holds a Master's degree in Mechanical Engineering from Dublin City University.
