

Warren Gee

Vice President Business Development, Rolls-Royce

Warren brings over 20 years of experience from Rolls-Royce in the aerospace engine sector, where he has held senior leadership roles across Manufacturing, Strategy and Business Improvement. He is currently Vice President Business Development, with responsibility for supply chain strategy across civil and defence aerospace, as well as leading strategic initiatives including country strategies and developing supply chain strategies for future programmes.

Warren also serves as Chair of the Aerospace Growth Partnership (AGP) Manufacturing and Supply Chain Working Group, playing a key role in shaping the future competitiveness of the UK aerospace sector. He holds a Bachelor's degree in Mechanical Engineering, a Masters degree in Strategic Quality, and is a Fellow of the Institution of Mechanical Engineers.
