

## **Chris Weir**

### **Chief Technology Officer**

Chris has over 30 years' senior engineering experience covering the full lifecycle of aerospace, defence and space equipment systems for companies including Rolls-Royce and Goodrich (now part of Collins Aerospace). He has been supporting the MAA with technology strategy development and delivery since 2021, most recently leading the Decarbonising the Midlands Aerospace Cluster (DMAC) project which is planning how supply chain companies can achieve net zero by 2050.
