

Nigel Hart
Head of Digital and Data – Rolls-Royce Small Modular Reactor
Rolls-Royce

Nigel Hart has over 20 years of experience of industrial innovation and technology development. He is currently Head of Digital and Data of the Rolls-Royce Small Modular Reactor Programme. In this role he is responsible for delivering the Digital Twin of the RR-SMR and identifying opportunities to deploy leading digital technology.

Following academic studies in Physics and Materials, he started his career with Rolls-Royce developing novel hydrogen fuel-cells and held roles of increasing responsibility including Head of Rolls-Royce's Advanced Technology Centre in Singapore, Head of Technology of the RR-SMR programme, and Programme Exec of Internet of Things (IoT).
