

## **Meaghan Preece**

### **Hydromechanical Engineer, Military Actuation Engineering**

Meaghan Preece is a hydromechanical engineer at Moog Military Aircraft Group, where she specializes in flight control delivery for military platforms. Additionally, she chairs WREN (Women's Resource & Equity Network) an employee resource group dedicated to improving female representation and leadership at all levels of the business. Through WREN, Meaghan champions initiatives that promote equitable leadership opportunities, access to resources and meaningful influence in decision making.

Originally from Canada and now living in Shropshire, Meaghan is a visible advocate for building workplace cultures that benefit both employees and business alike. She is committed to challenging outdated workplace norms and driving tangible change through ally education and advocacy. Meaghan will be exploring the strategic role of ERGs as a business function, why retention is more important than recruitment and how diversity and allyship lead to stronger teams and better results.
