

# TransNetAero meetings Switzerland

25<sup>th</sup> March 2014

Altenrhein (near Zurich)

## Aim

The aim of this third TransNetAero event in Switzerland is to connect aerospace suppliers across Europe.

- Learn about what international aerospace customers really need.
- Promote your company internationally
- Learn about how to overcome supplier challenges in the aerospace supply chain and
- Benchmark and learn from best practice case studies.

This event is set up for European aerospace suppliers of any size with an interest in:

- latest supplier requirements from major aerospace customers
- participation in a European networking event to promote their company
- learning more about how research centres across Europe can help them adopt new product and process technologies and manage their own supply chains
- understanding a program to enhance the skills of aerospace employees
- meeting and networking with companies from around Europe

The TransNetAero event is held in a central aerospace region in Switzerland, which is closely interlinked to very strong aerospace industries in Southern Germany (Baden Württemberg and Bavaria) and Austria. The event takes place on the day before the great Bodensee Aerospace Forum, which is held every year with between 150 and 200 participants and offers another opportunity to meet new potential partners and network.

## How to get there

- Train to St. Gallen (1 hour from Zurich Airport by intercity train)
- Train, bus or taxi to Air Museum at regional Airport Altenrhein

## Program: 25th March 2014: B2B meetings in Altenrhein
